

Reading is important because...

Strong reading and writing skills are essential for success in school and later life. Although most children learn to read in their classroom programs, a few children have great difficulty learning to read and write. Reading Recovery can help!

Scientific evidence reviewed by the U.S. Department of Education's What Works Clearinghouse confirms that Reading Recovery is effective.

**Success in
Beginning Reading**

25 Years of Excellence in North America

- Nearly 2 million American first graders have had Reading Recovery lessons.
- 75% reached grade-level standard at the end of their lessons.
- All children make progress, but a few do not reach grade-level standard. Information from Reading Recovery lessons helps schools and parents plan future evaluation and services.

Reading Recovery works because...

- highly trained teachers work intensively, with individual children each school day.
- lessons are planned to build on the knowledge and strengths of each child.

Families can help by...

- being sure your child's school attendance is as regular as possible.
- listening to your child read books sent home by the Reading Recovery teacher.
- making reading time positive, short, and enjoyable.
- returning the books each day so the teacher can send home new books.

Reading Recovery®

Reading Recovery is...

- For first graders who struggle with early reading and writing
- Individual 30-minute lessons
- Free (no cost to families)
- Research-based
- Short-term, just 12 to 20 weeks (30 to 50 hours)

Reading Recovery is available in some areas to children who are learning to read in Spanish. Descubriendo la Lectura is taught by specially trained teachers.

Reading Recovery is not...

- Special education
- A replacement for classroom teaching
