

LAB 6

For 5 points, answer the following questions:

List the three things you should never do when working on a client's computer:

- 1.
- 2.
- 3.

What is a multimeter used for?:

Why would you want to carry a blank thumb drive?:

Lab in practice:

1. In Microsoft Word, Create a list of all of the software installed on your workstation in class. Be sure to include what version of the software and keep in mind, the operating system is considered to be software. When finished, print out your list and attach it to back of your lab worksheet. (5 points)
2. On a blank piece of paper, create a diagram of your class room. Be as detailed as possible listing all of the computer locations, network locations, power locations, and furniture locations. It is up to you how detailed you get with this assignment, but the more detailed the better. Be sure to label the items as well. When finished attach your diagram to the back of your lab worksheet. (5 points)
3. In class you will be given a blank floppy disk. (5 points)
 - a. Label the floppy disk with your name.
 - b. Connect to <http://www.bootdisk.com>
 - c. Create a Windows 98 SE boot disk and turn it in with your lab.
