Basic HTML Documents
Lab 8
(30 Points)

Create a couple of web pages explaining what you and your family does over the Fall Season. You can include information ranging from the months of September to November, but **do not include** the month of December or Winter Break. Does your family have any special parties or traditions? Now is the time to create a web page for them.

You can be as creative as you like, but your project needs to include the following:

At least (2) web pages with the proper outline	5 points
Links between all pages (navigation)	2 points
At least one image	2 points
Colored text and links	3 points
At least 1 table	3 points
At least 1 list	3 points
You name, date, and project name at some location	2 points
Create the web pages in Notepad **DO NOT USE ANY EDITORS**	5 points

Again, have fun with the project. Be as creative as you want. No points will be deducted for poor design, but point will be deducted if the basic minimums are not met. GOING BEYOND the minimum will get you some BONUS POINTS on this project.

5 POINTS PERFORM THE FOLLOWING PROCEDURE EXACTLY

1) Create your web pages and save them in a folder under your My Documents called My First Web Project. Put all of your pages and images in that folder so that they can be viewed by the instructor.
2) When finished, print out all of your web pages from the browser.
3) Print out all of the source code from Notepad
4) Staple them all together with the browser print outs on top.
5) Write your name and date on the top right of the paper.
6) Turn it all in.
